

WHY should I be concerned about computer waste?

Every computer and monitor contains **toxins such as lead, cadmium and mercury.**

By choosing to donate your computer, you prevent the disposal of these toxins in our landfills and help our community through skill development. Students and individuals processing and refurbishing the computers will benefit from hands-on experience, individuals and organizations who receive the donated computers will benefit from having access to a computer.

CREAM partners are

City of Vancouver

Clark College

Clark County

Columbia Resource Company

The Salvation Army

WHAT can I do with my old computer?

Donate Your Computer to

CREAM
Computer Reuse And Marketing
